

# Zimbra 8.8

## Enterprise Email & Collaboration Platform

### What Is Zimbra Collaboration?

Zimbra Collaboration is the world's leading open source platform for email, messaging and collaboration — trusted by more than 5,000 companies and public sector customers, and over 500 million end users, in over 140 countries. Zimbra includes complete email, contacts, calendar, file sharing, tasks, full-featured messaging and videoconferencing, and it can all be accessed from the Zimbra Web client via any device. You can deploy Zimbra as a traditional on-prem install or through a Zimbra hosting provider.

### Key 8.8 Features

Zimbra Collaboration 8.8 includes powerful new technology and enhancements that make this the most competitive version of Zimbra yet, while still continuing to deliver on our consistent strengths of:

- Lowest TCO in the industry
- Best-in-class security and privacy
- Most diverse deployment options
- Greatest extensibility of any email platform

### Zimbra Talk V2

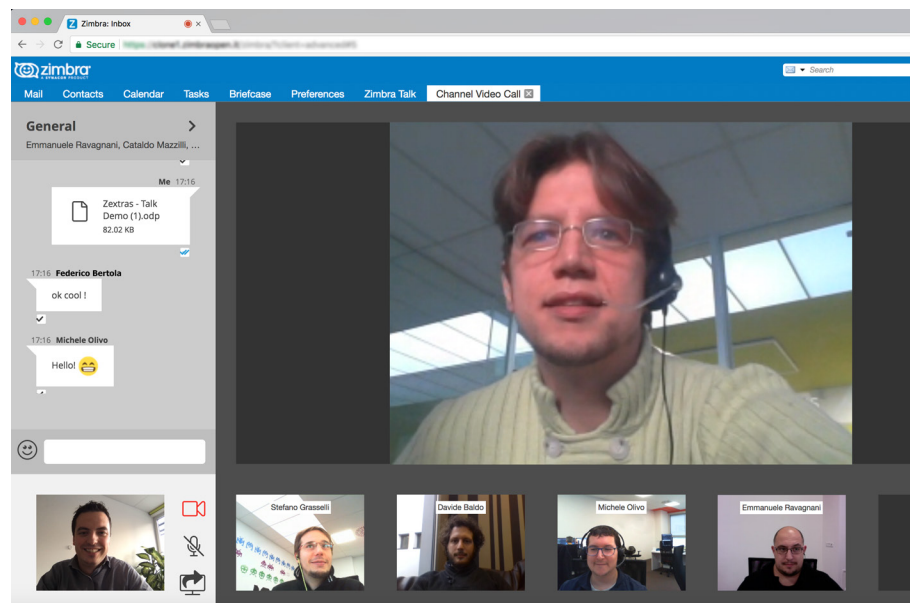

Enterprise-level messaging now available as an addition to the Zimbra Web Client, with no third-party products and simple installation. Available in Zimbra Network Edition 8.8.8!

- 1:1 and group messaging
- 1:1 and group videoconferencing
- Buddy list management and presence
- Message delivery and read awareness
- File sharing
- Screen sharing
- Corporate messaging (Spaces and Channels)
- Channel videoconferencing with unlimited participants
- Emojis

### NEW KEY FEATURES

- **Zimbra Talk V2**
- **Zimbra Drive**
- **Realtime Backup & Restore**
- **Hierarchical Storage Management (HSM)**
- **Improved ActiveSync Technology**
- **Simplified Delegated Admin**

ZIMBRA PRODUCT OVERVIEW  
ZIMBRA COLLABORATION

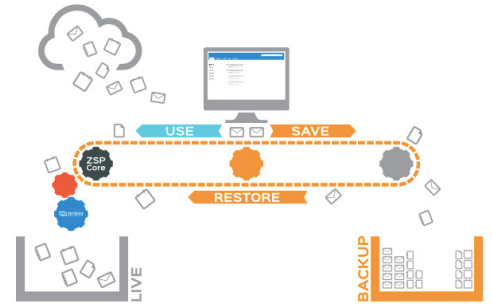

## Zimbra Drive

Also available in all versions of Zimbra is Zimbra Drive, our updated file sync and share functionality. Built on the ownCloud/Nextcloud platform, Zimbra Drive provides seamless synchronization and sharing of files between your users, wherever they are and on any device.

## Realtime Backup and Restore

Zimbra's new realtime backup and restore engine backs up every single item and event on your server with split second precision. It's designed to avoid data loss using atomic and ever-consistent algorithms, while still saving disk space — up to 50% — thanks to an intelligent deduplication and compression system. It offers six restore features, from a single-item restore to complete disaster recovery. All of the restore modes are transparent to the end-user and are 100% OS, architecture and version independent.

## Mobile Sync

What's new about Zimbra's mobile sync functionality? Users can now sync their shared Zimbra items along with all of their other Zimbra data. Using Exchange ActiveSync protocol, which is natively supported by the vast majority of mobile devices, your data will always be at your fingertips, without any middle-ware or dedicated client.

## Delegated Admin

In minutes, you can now grant Delegated Admin rights to users, allowing them to perform management tasks such as setting quotas, COS and user limits for your domains. Keep track of your Delegated Admins' actions and your domain status with new reporting features, straight from your Zimbra Administration Console thanks to the dedicated Administration Zimlet.

## HSM

Featuring advanced Zimbra store management and HSM, you can now manage multiple volumes and HSM policies through your Zimbra Administration Console. Save up to 50% of your valuable storage space, easily expand your Zimbra server by adding new volumes at will, and improve your server performance by splitting the I/O load onto different storage media and different tiers of storage equipment.
